

Crimson Dropwing

Scientific name : *Trithemis aurora*

English name : Crimson Dropwing

Family : Libellulidae

Origin : Southern China and countries in South Asia and Southeast Asia.

Habitat : Found near ponds, swamps, canals, and slow-moving streams and rivers.

Body Length : 3.3-3.5 cm

Body Characteristics : Males have a pinkish-red body.

Features : In the summer, they often point their abdomen towards the sun to reduce heat absorption.
